

January 2021

New Years Greetings from 1776 American Empowered

Welcome to All Who Love Our Country

It is our time of year that we tend to look back over the past and make plans for the future. This year has been an exceptionally difficult for everyone and it continues to stretch its influence over everything we do. Our lives have been changed dramatically and influences that never showed their faces out in public are now flexing their muscles. If we are not careful, our freedoms may be washed away in the name of security, modernization, and adaptation.

We at 1776 American Empowered have a very important role that will be in the forefront for this upcoming year. With the expansion of governmental powers, we are determined to keep a watchful eye on all that is dispatched, no matter which branch of our government issues the decree. If our Constitutional rights are violated, we will not only notify you, but give you methods to combat it, legally and peacefully.

We must protect our Constitution and all the rights we have as Americans. We will not knowingly let anything pass that infringes on your rights and we will announce it through all the means we have at our disposal. It does not matter which group is in the majority, we will raise our voices as one!

So for our first newsletter, we wanted to thank you for your support as we have just begun our journey together. Have safe and happy holidays! Keep your eyes open for more information as we expand our presence in all the major legislative declarations. Be prepared is a well spoken motto, not only for the Scouts, but for all Americans who would be free!

At What Cost Freedom?

This expression is used so many times that we don't really give it much thought. Maybe we should change it to *what would you give to stay Free?* We don't really think, deep down inside, that our freedoms of choice, election, or way of life, are being threatened. If a war does not unfold on our doorstep like 9/11 did, we feel relatively secure. We hurry around like ants on a quest performing our day to day routines with no thought about what could be lost.

Each of us is given abilities or gifts. Some can build with their hands. Some can speak and influence their audience. Some can write and persuade or educate. Some are born organizers. In other words, everyone can help in the fight for preservation of our way of life *IF THEY TAKE THE TIME.*

Time. That is the most difficult item on our wish lists. We are inundated with *things to*

do that fill our extra moments outside of earning a living. Things like kids, shopping, cooking, cleaning, holidays, watching our favorite programs, gaming, talking or chatting online, facebook, streaming....oh wait — when did those things become part of our routine?

Our time has been redirected. Our priorities have shifted and the social, leisure, and spare moments have been gobbled up into a very great void. When we look over our day (if we have enough energy at the end of the day to do so), we don't feel we have accomplished anything.

If we want to keep our Constitution intact, we have to reprioritize our spare moments. Galvanize them as if our lives depend on it —because it does! Think about what you can do to save our way of life. **WE NEED YOUR HELP!**

Here at 1776 American Empowered, we will be showing people who wish to preserve what we have, what they can do to help. This will be happening all over the country in small and large groups. We must take action, but unified and targeted.

If something sends up red flags, threatening to erode one or more of our freedoms, 1776 American Empowered will give you a plan to take action.

Our Constitutional Compass – Designed by the Constitution!

Its purpose — to help us decide if what we are reading, hearing, or thinking promotes freedom or something else. A compass is so necessary when we get disorientated. It helps us to stay focused on what is truth and what is taking us away from our goal. Oh and by the way –**MADE IN THE USA!**

*Join in the Fight to preserve what we
have that ensures that we remain the
Greatest Nation of Freedoms!*

What We Intend To Do

To educate people on the fundamental documents that created our Freedom.

To allow us to have differences of opinions and not feel angry or threatened.

Watching Legislators Bills and Decrees

To ask tough questions and to work together as a group for a solution to the problem.

To remove personal agendas from politics.

Bring back our country to represent Freedom created by the United States Constitution and teach all what it means to them.

What you must do

Don't focus on what we have lost. Focus on what you have and visualize what you want to accomplish. Huge changes don't come through huge victories but through small victories that add up to huge victories. We all currently have a Constitution as US Citizens. Don't let anyone take that from you! Stay connected to that today and walk with determination to protect it!

There is only one United States - let no man or woman go unchecked if they try to undo our freedom.

What have we lost so far?

1. Moving freely around the country without regulations and restrictions.
2. Privacy — Conversations listened in on with our cell phones and landlines.
3. Social media controlling news flow.
4. Freedom of speech in public.
5. Freedom of the press. Must follow the pack.
6. Freedom of religion — closed for our safety.
7. Elections we feel are fair and legal.
8. A government that has its constituents welfare in mind, without agendas.
9. Financial security and Fiscal Responsibility.
10. Belief that our government will protect us from our enemies - like China.

This is not the entire list, just a sampling of what has been lost. Now if you look at the list, each item can be justified in the name of Health and Welfare of the country.

Over the last few years our lives have been turned upside down. When circumstances cause our government officials to take liberties and set aside the law, it is time to rise up and take action! Don't wait for someone else to do something. Let us know you are interested in doing something and we will find a way to use your talents!

Our goal at 1776 American Empowered is to:

1. Do away with our political parties. No Democrats or Republicans. No sides to divide us. When people run for a position in our government - we are voting on the person and their goals in office, not their political party and its agenda.
2. Minimalist - start to simplify our political system.
3. Term limits on political positions.
4. Term limits on bills sitting to be voted on.
5. Examination of lobbyist and their purpose.
6. Examination of our education system and its commitment to teaching young minds about our American Values. Civic classes and more.
7. We will train future political individuals to be responsible for protecting our Constitutional values and to honor the oath of office. Right now this is not always a thought.
8. We will rate political individuals as to their time in office to indicate how they follow their own promises to us.

These are but some of the reasons for creating this group. Originally, we were trying to find a middle ground to allow for discussion. However, now we realize that is impossible due to deep pockets and corruption in our system.

We the People have the desire to have this atmosphere but those who have been in power for long periods of time have no intention in letting the people back in to control them.

So it is a choice of what we will allow. If we say 'We the People' deserve to be in control — then we must move in that direction. If you say you think we are okay and want to allow things to continue on the way they are headed, then just do nothing. You can allow

the 'currents of politics' to control us like cattle and all that is left to do is to complain about it.

1776 American Empowered is here to serve our country and its people. All the people, not the hand picked few which get into power and control it.

Resolute Call to Action!

Okay, we have established there is a lot to do. And we have established that we are all responsible to do things to prevent loss of our way of life. So here is some things you can do to help your country and us at 1776 American Empowered:

1. Think about the things we have talked about and see if you agree.
2. Decide if you want to get involved with the fight that is already in play.
3. Look at your way of handling time. See if you could free up some of your time or reprioritize some of it.
4. Let us know if you would be interested in starting an action group. It might surprise you how effective they can be in a community.
5. Let us know what topics are of an interest to you. We do research on such a wide array that what interests you have might be something that falls into our categories. Now we are talking about things dealing with government, schools, legislation, etc. Not what goes on in Hollywood or other not so important topics.

Email or write us your thoughts and opinions.
